Next-gen password manager with advanced security features

Give your team the tools they need with NordPass to safely manage and share passwords and other sensitive data. Ensure your operations are both secure and efficient.

Ditch passwords for passkeys

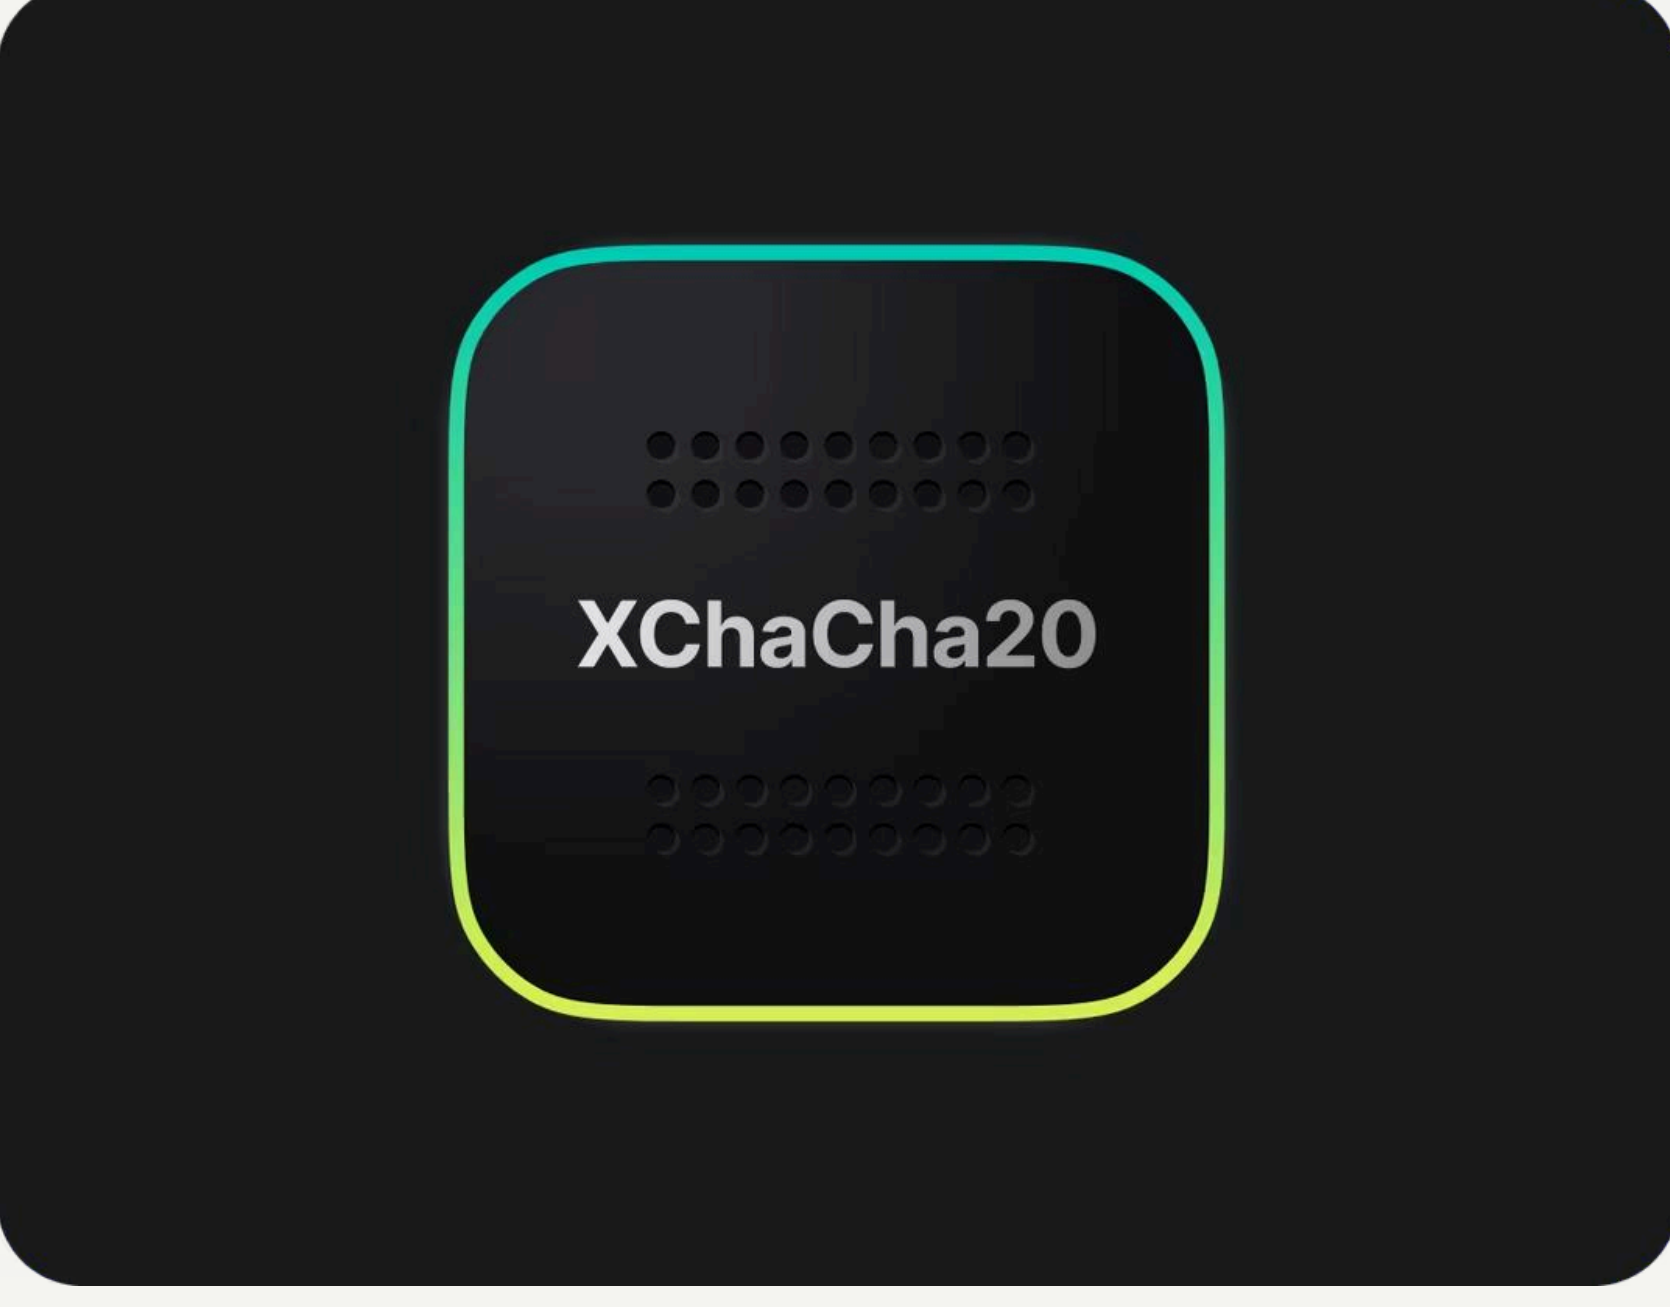

Passkeys offer a new, more secure, and seamless way to log in to your accounts, whether at home or at work.

[Learn more about passkeys](#)

Protect data with end-to-end encryption

NordPass uses xChaCha20 encryption within its zero-knowledge architecture to ensure that only authorized users can access sensitive data in the vault.

Boost security with a built-in authenticator

Generate time-based one-time passwords (TOTPs) directly in NordPass for secure, simplified two-factor authentication, adding an extra layer of protection to your accounts.

[What is the built-in authenticator?](#)

Monitor potential data breaches

Set up Breach Monitoring and scan the web for breaches involving your company emails and domains. Receive timely alerts in case your data is found to be exposed.

Here's what our users have to say

Business

YouTube

Trustpilot

Twitter

It is more reactive and works faster than the competition. NordPass also matches the cost-effectiveness ratio, but the bottom line is that it was selected because it is easy and convenient to use.

- Tauras Steponavičius,
IT Project Manager

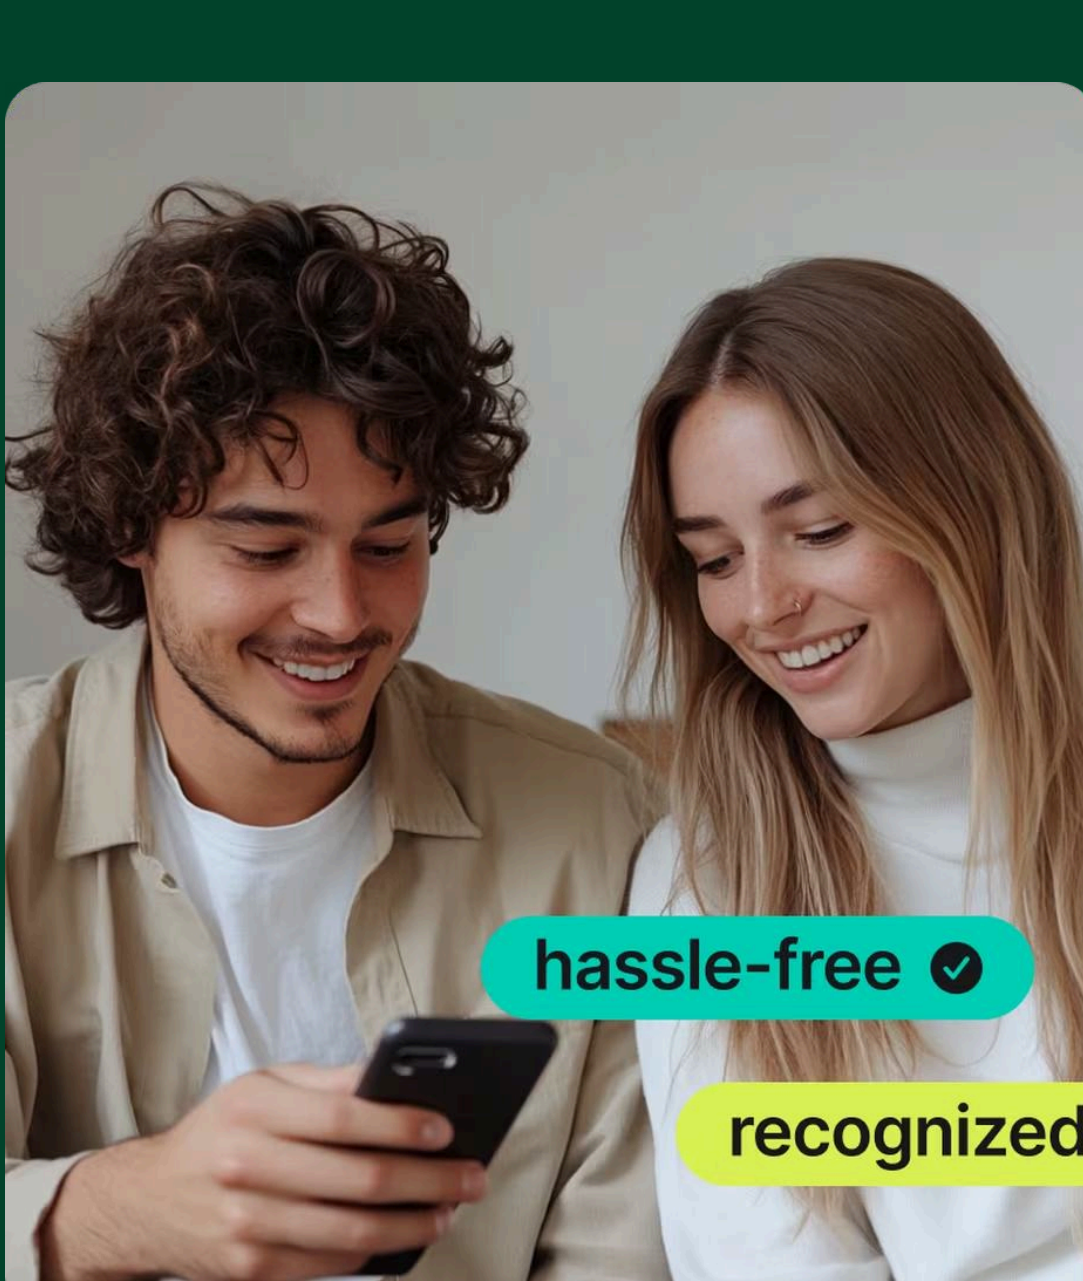

Because NordPass has central management of user accounts and features like Data Breach Scanner and password health checks, it's now easier to monitor password security status and ensure that our employees are following our password policy requirements.

- Egidijus Navardauskas,
Head of Cyber Security

The autofill and autosave features are also universally loved. The staff loves the fact that they no longer have to manually type or even come up with new passwords. NordPass does everything for them.

- Katie Whiteside,
Head of Business Operations & Finance
